Technico is a progressive CNC machining facility with a full-time staff actively involved in all facets of production. We specialize in manufacturing precision machined parts from raw stock or cast materials with a full range of manual and CNC equipment from ½" up to 16" in diameter in turning and from one ounce to 100 pounds in milling.

Our state-of-the-art facilities and team of expert professionals can service customers in every industry from aerospace to military. Customer satisfaction is above all else as we diligently work through all phases of production from purchasing raw material through final inspection and packaging.

Turning: Technico's CNC turning capabilities allow us to machine a variety of shapes including taper, contour, radius profiles, and threaded surfaces.

Milling: Using advanced processes and the latest equipment, Technico is able to create almost any 2D or 3D shape. Our cutting tools move in all four dimensions to achieve the precise cut shape and profile you desire.

Materials: Technico manufacturers quality parts using all Ferrous and non-Ferrous alloys in bar, tubing, and plate, while also machining a wide variety

Technico's capabilities range from conventional machining to CNC vertical milling and CNC turning. These allow us to provide precision milling for the military, aerospace, medical, mass transit, and other industries.

From prototype or one piece to full-scale parts production, Technico offers a wide range of services, including jig machining, fixtures, automated tooling, and more. This machining strength is complemented by an ability to work with all manner of materials: aluminum, stainless- and tool steels, and plastics, as well as other engineered and exotic materials

Capabilities:

- Drilling and Tapping*
- Rail Jointing*
- Turning*
- Threading*
- Keyways*
- Reverse Engineering*
- Quick Delivery*
- Small or Large Quantities*
